

IFRS S1 and S2

Services in Oman

Training, reporting and implementation

TRAINING / IMPLEMENTATION / REPORTING

Verimply helps organisations in Oman prepare for IFRS S1 and S2 through tailored training, practical implementation support and reporting through our AI-enabled Verimply platform. We support your teams in understanding the standards, identifying sustainability-related risks and opportunities, and establishing the governance arrangements, data collection processes and internal responsibilities needed to prepare credible sustainability-related financial disclosures.

Working closely with your finance, risk and sustainability teams, we translate reporting requirements into a practical programme aligned with your sector, organisational structure and level of readiness. From assessing gaps and building internal capabilities to organising data, developing metrics and preparing disclosures, we help you connect sustainability information with financial planning and business decisions, while building a repeatable reporting process that your organisation can maintain over time.

Prepare for Oman's reporting transition

Oman's reporting landscape combines existing MSX ESG disclosure requirements with a timetable for adopting the IFRS Sustainability Disclosure Standards. Listed businesses should build on their current reporting while preparing for the additional financial focus of IFRS S1 and S2. [1, 2]

NOW

Address applicable MSX ESG disclosure requirements and assess readiness for IFRS S1 and S2.

1 JAN 2029

Application of IFRS S1 and S2 under FSA Decision E/7/2026 for listed public joint-stock companies and financial institutions.

1 JAN 2030

Scope 3 greenhouse gas emissions requirements under IFRS S2 apply under the same decision. [1]

What the standards mean for your business

IFRS S1 addresses sustainability-related risks and opportunities that could affect cash flows, access to finance or cost of capital. **IFRS S2** focuses on climate-related risks and opportunities. Both connect disclosures to governance, strategy, risk management, and metrics and targets. [3]

Early preparation gives your teams time to establish responsibilities, improve data quality and connect sustainability information with financial planning. The right starting point is a review of your existing reports, processes and priorities.

Sources and regulatory context

Regulatory context checked on 12 October 2026. Entity-specific applicability and any transition provisions should be confirmed when defining the engagement.

How Veriimpact supports you

Choose a focused assignment or a coordinated programme combining training, implementation and reporting.

01 Training for boards and teams

Through Veriimpact Academy, we explain IFRS S1 and S2 and their practical implications for leadership, finance, risk and sustainability teams. Sessions can cover financial materiality, governance, climate disclosures, emissions and the connection with financial reporting. Sessions can be tailored to different teams, including the Board of Directors, Compliance Department, ESG/Sustainability Team, or a one-to-one session with the CEO.

What you receive: Practical workshops, learning materials, checklists and clarity on the actions each team needs to take.

02 Implementation support

We assess gaps, develop a phased roadmap and help establish responsibilities, data collection processes and review controls. Support can include sustainability and climate risk assessment, emissions inventories, scenario analysis and consideration of financial effects, according to the agreed scope.

What you receive: A prioritised action plan, clear data ownership and working processes to support disclosure preparation.

03 Reporting creation

Through our updated AI-enabled Veriimpact platform, we help your teams organise information and prepare IFRS S1 and S2 disclosures, bringing together narrative, metrics and supporting evidence. The platform also supports GRI reporting and enables information to be reused across frameworks while preserving their distinct reporting objectives.

What you receive: A ready-to-print IFRS S1 and S2 report, professionally made with your branding to be used with banks, investors and other stakeholders.

Start with your priorities

Book a 30-minute introductory discussion to explore your current reporting, team training needs and implementation priorities. We will propose a scope of work with defined deliverables, responsibilities and a timeline.
